

Dear all,

the sixth season is behind us, we have matured, and I am most pleased that the team is still together and ready for new challenges.

When we started six year ago, everything was conceived as an interesting event that will improve the tourist offer. The next year brought us cooperation with television, through which we gained popularity. The following years were full of challenges with the goal of keeping the project going on and continuing to develop it as well.

We rounded up the sixth season with a competition between nine countries whereby we achieved the set goal, that is expanding the project. We are moving forward. We have a great team, enthusiastic competitors, more TV networks eager to participate and additionally there is also the interest of new countries that wish to become a part of this project.

There are many partners who became a part of this project and helped to make it special and unique. We are moving on with goal to become even better, bigger, more interesting. We hope you can join us on our campaign to promote good will and positive energy. After all under the surface we are all quite alike – ordinary simple folks looking for fun and good times.

See you next year at our favourite games.

Miroslav Krzyk

Project author and organizer

A handwritten signature in blue ink, appearing to be 'MK' or similar, written in a stylized, cursive manner.

WHAT ARE CITY GAMES?

City games are a sport and entertainment event organized during summer months with the goal of broadening the tourist offer and promoting companionship between cities and countries.

City games are organized as a series of competitions between teams that are representatives of their cities. Due to its diversity, the project is intended to suit all generations.

After six years project gained more and more popularity on the international scene, and we are proud to announce that now we have regional representatives in Slovenia, Serbia, Austria, Hungary, Montenegro and Italy, where an increased number of competitions is expected in the future. Thus we were compelled to change the original name "Adriatic Games" to City Games. The seventh season will bring us new entertaining disciplines, new countries and new media platforms that will secure more visibility for the project and its partners.

The 2016. City Games finals will be filmed and produced into 80 minutes dynamic TV shows broadcasted in 10 european countries!

GOALS

- Creating a dynamic TV show broadcasted on channels throughout Europe.
- Encouraging cooperation between countries through friendships between teams.
- Promotion of tourist, cultural and economic activities between cities from EU member states as well as countries in the region.
- Promotion of autochthonous souvenirs and products.
- Educating young people about cultural heritage and tradition of their region through interesting games and activities.

WHAT GAMES ARE WE PLAYING?

Various games and disciplines are the foundation of this project. They are designed with purpose to entertain, educate and inspire as well as to promote common values and respect different traditions. They are also designed to be modern and attractive for competitors, event audience and broad TV public.

Padlle

Since the beginning of time paddling was vital discipline to master for traveling and fishing on sea, lakes or rivers. In the "Paddle" game, competitors are fighting to pull the rival team thus proving their superiority. Strength, team spirit and synchronised movements are distinguishing the winners in this game. The physically strenuous and demanding game unleashes the competitive spirit among competitors which is best manifested through the players' emotions during this game.

Water Basket

Basketball has always commanded awe from any true sports fan. Speed, skill and precision are the basic rules of this popular sport that seems to gain more popularity with each passing year. Basketball in the water sounds strange, but it can be done. It combines basketball elements with swimming. Competitors must climb over obstacles (in the form of island) as fast as possible to reach the ball that needs to be thrown into the hoop. It's pretty simple but one thing is guaranteed - laughter and fun in the audience and the adrenaline levels of our competitors are boosted by 200 %.

Sea Battle

Battles are an integral part of world history. Fight for territory, power and cultural identity has always been and still is a constant global theme. We wanted to show that battles should be nonviolent and rather more benevolent. In the dynamic game called Sea Battle, our competitors will try to conquer the territory of the rival team, by overcoming many different obstacles. Will they succeed?

Treasure

Stories about wrecked ships at the bottom of the sea, full of treasures, have tickled human imagination for generations. Search for these treasures is a challenge no one wants to miss. In the game Treasure, the contestants will compete in a quest for the treasure, that can be found only when all the pieces of the puzzle are solved. And as always, the first who finds the treasure is the winner.

Flying Water Polo

Summer holidays are often spent in various sports activities. One of them is water polo - a sport that has always encouraged rivalry between various cities that breathe and live water polo to the fullest. The addition of exciting jumps and three female competitors who play alongside their masculine teammates, guarantees more fun in this new brand of water polo.

Tug of War

Tug of War is a traditional sport of strength that was one of the Olympic disciplines in the period between 1900 and 1920. Apart from testing endurance and physical strength, the game also strengthens confidence on both individual and team levels. The goal is to tug the opposite team across the middle of the field which, besides being fun, also displays intense competitive team spirit.

Donkey Race

Donkeys are very stubborn and willful by nature, but also very noble and hardworking. A donkey will follow its owner only if he leads it down the right path. If he deviates from the path even slightly, he will evoke the donkey's stubbornness, which will make it difficult for the owner to put him back on track. This game that usually results in a lot of laughter requires good guidance skills and good mutual communication.

Fisherman`s Crates

Coastal towns have always been sea and fishing oriented. Fishing is still, to this day, one of the main economic activities that feeds thousands and thousands of families. Even though fishing is modernized nowadays, one thing remains the same – fish crates. Are younger generations still able to carry heavy crates full of fish? Both speed and skills will be tested in the game where teams compete against each other in carrying heavy crates.

Water Catepillar

We all have a child hidden deep in ourselves who just wants to play. Water Caterpillar is a game for our inner child. The goal is for competitors to carry over water to the measuring cylinder, trying to fill it up within the set time. However, in order for the whole game to be more interesting and attractive with lots of laughter, the canister for carrying water is full of holes and the water is continuously flowing out. Entertainment is guaranteed!

Archers

A steady hand and a 20/20 vision are the features of a good archer. The bow has been modernized through time and replaced by a crossbow. Arrows remained the same, and the goal still hasn't changed – to hit the smallest circle of the target as many times as possible. The centennial tradition of archery is a unique opportunity for competitors of the City Games to experience the spirit of the Middle Ages.

Wine

The wine drinking ritual is a part of almost every culture. Enjoying wine's magical flavors is the final step of that ritual. To get to that moment we have to go through the whole process - from grape harvesting to cellar production. Our game is a demonstration of the old fashioned way, which serves as a reminder of the traditional wine producing techniques. While men painstakingly harvest grapes on the island, their women are on the mainland, waiting for the opportunity to squeeze out the most juice from the grapes. And just like in any other chore, many obstacles have to be overcome, which makes the task harder.

Prosciutto

Every region has its own way and its own little secrets when it comes to making a delicacy known by the name prosciutto. Even the simple mention of the word prosciutto evokes tempting memories of its smell and taste, making the contestants try even harder to reach the prosciutto and enjoy its heavenly taste. The game requires speed and skill in climbing the rope which is often very slippery and not an easy obstacle to overcome on the way to the goal - the prosciutto.

Sea Alka

Alka is a symbol of heroism and centennial tradition of the central Adriatic region. The mission of the competitor is to get the ring (alka), facing many difficulties and tribulations in the meantime. The game requires precision from the participant and brings out the feelings of pride and supremacy once he hits the ring in the center.

Tourist Rescuing

While enjoying the charms of the Adriatic Sea, female tourists often forget that the sea can be very tempestuous and unpredictable. Alone, lost and scared, they are waiting for someone to help. When the situation already seems hopeless, usually some local lads appear brave enough to save the unfortunate tourists. They will try to win their hearts and maybe even steal a kiss for a job well done.

Water

Potable water is our greatest treasure which we have to cherish and preserve. This fact was well known to the ancient island residents, who were forced to transport water from the mainland to the island in barrels or clay pots. Evoking the memories of the old days, the contestants will face many problems that may arise in the process of supplying water to the islanders. If the pipes are properly connected, the water will start flowing, but if only one is not in its place, there won't be any water on the island.

Barrel Race

Humans are resourceful creatures by nature and they will always find a way to get something done. In this game, our female contestants will try to overcome obstacles which arise when one is forced to paddle in a barrel. The barrel is anything but stable, and very tricky to steer. To make things even harder, the ladies have to switch places from one barrel to another.

WHERE ARE WE PLAYING?

At the very beginning City Games mainly used seaside promenades (rivas) as sporting arenas. However, as the project grew, so did the challenges as to where all these games can take place.

So in addition to rivas, the games are also being organized in indoor and outdoor swimming pools as well as on lakes.

Almost every town has a special place suitable for our caravan to disembark and prepare a City Games arena. Season after season we are discovering new sites and places for the games. We can proudly say that we are very adoptable and have tons of experience in locations scouting.

During the past several years City Games were organized 218 times in more than 100 different locations!

Rijeka (CRO)

Herceg Novi (MNE)

Koper (SLO)

Tivat (MNE)

Neum (BiH)

Velenje (SLO)

CITY GAMES AND OUR HOST CITIES...

Without our wonderful hosts our project couldn't grow for six seasons in a row. Therefore the cooperation with them is always based on a partnership relation.

During the past 16 years, since our agency beginnings, it is almost impossible to find a place in the Alpe Adria & Balkan region that we weren't in contact with. We can proudly say that we have more than 100 cities as our satisfied clients with whom we cooperate on a regular basis.

The 2015. season has brought us a dozen of new host cities. The successful cooperation is confirmed with many facts – more and more competitive teams, numerous visitors and letters of recommendation from our satisfied partners.

City Games are at the very top of huge manifestations, especially when it comes to the importance of promoting a destination. City Games have definitely characterized past tourist seasons because the project was organized very professionally by the whole team. Organizing the international finals in Biograd was a big honour for us, but also a promotion outside Croatia enabling us to present the offer of our region in the best way possible.

We are looking forward to the games next year!

Marijan Stopfer, Deputy Mayor of the City Biograd na Moru

There is no doubt whatsoever that this project is a sports, entertainment and tourist event in which manifested are not only sports results but also courage, beauty and grace securing them a special charm and an exceptional experience for all participants and spectators. City Games allow the development of beautiful human relationships and companionships and therefore, with great pleasure, we want to continue to organize this competition in the future as well and to promote Podgorica in this way as well as its readiness for international, sports, cultural and every other cooperation.

Rajko Čupić, City of Podgorica Secretariat for Culture and Sport

”

If they didn't already exist, they should be invented!

City Games, for which Tivat was the host for the first time, brought back to our city memories of past days, they awakened the spirit of closeness and togetherness. It was wonderful to see and hear on Tivat seaside promenade the cheering atmosphere and to feel the positive energy both of the competitors as well as of the audience. That night Tivat was cheering for the games in which skill, persistence and competitive spirit were the final result. Bravo for the creators of the games, the technical organization which had the full support of us as the host. Thank you for the feeling of happiness and trust.

Dubravka Nikčević, Secretariat for Administration and Social Activities of Tivat Municipality

”

Since this project was organized for the first time, not only in Neum but also in Bosnia and Herzegovina, we cannot hide our satisfaction. The indication is that this manifestation will surely contribute to promoting the city itself as well as the broader region. For the organization and all related to the organization of the games just top grades, especially when talking about professionalism.

Andrija Krešić, Director of Herzegovina - Neretva Canton Tourist Board

EXCELLENT EVENT...

In order to organize a unforgettable event, we must fulfill the requests of numerous audience that are faithfully following us.

City Games is an event which will surely meet the criteria of even the most demanding ones. Why? Because we have everything – from perfect entertainment to top players and fans.

We have hostesses prepared to entertain the audience in several foreign languages from the first to the last minute of the event, and the entertainment program also includes interesting prize games in which the audience can participate.

We have vivacious competitors eager for good competitions and even better entertainment.

We have attractive and interesting disciplines that all of us enjoy.

And, last but not least – we have the best fans in the world, which is proven by the fact that a thousand of them are continuously standing on their feet for 3 hours and cheering their favourite team.

The experiences of the organizers from numerous projects have secured that City Games, in a short period of time, became a true hit in the Region recognized by numerous institutions, persons, and especially by tourists who are visiting our coast. Continue with the same tempo, enjoy the work you are doing so well and it will be our pleasure to continue the cooperation. See you next year!

Nediljko Vučetić,
Director of Municipality Malinska-Dubašnica Tourist Board

This summer we in Velenje decided to organize the games at the Velenje beach because we wanted to enrich the beach with a huge sports-entertainment project where we recognized the possibility to attract to our city a large number of visitors from abroad. We were most satisfied with the organization and the number of visitors enabling us to close the swimming season in Velenje with a great atmosphere and noisy cheering. For the next year 2016 our wish is to organize the Slovenian finals in Velenje!

Bojan Kontič, Mayor of the City of Velenje

Nostalgia for fun, joy and companionship...the competitors' and organizers' positive energy describe this project in short.

It is a manifestation which, without any doubt, belongs to our environment and with its content it is the best promotion of unburdened summer fun at our coast.

Sekule Popovič,
Municipality Koper Social Services and Development Office

...AN EVEN BETTER TV SHOW

As early as of the second season, our Games were loved not only by the competitors and the audience but also by TV networks. When city teams were introduced on TV screens, all generations came to love this project, and it is no surprise that it became one of the most popular TV shows in region.

For all the above mentioned, we owe thanks to a big team of people working several months in advance on every single show in order for everything to be functioning well. And they succeeded. Everything was perfect – from costumes, set design to light, and finally, to the filmed material broadcasted on TV.

In the sixth season we changed the broadcasting format from live transmission to dynamically edited 80 minutes game shows. 3 TV shows produced from the two international semifinal events and one final event of the competition were broadcasted on national televisions in 6 countries and they all scored great viewing ratings.

We believe that the further development of the City Games project largely depends on a quality of TV shows produced. Therefore our plan is to significantly invest in the TV production. In 2016. we are expecting participation of 12 countries with the same number of national television networks that will present City Games to approximately 70 million viewers!

For us it was an honour to host cheerful teams from nine European countries competing for two days and measuring their strength, endurance and persistence. During these days Kantrida swimming pools were swarmed with playful competitors, colourful props and gales of laughter caused by well thought-out semi-final games. City Games are a great opportunity for the tourist promotion of Rijeka by means of sports and fun as well as for the promotion of our excellent sports infrastructure, all the more so since the shows are broadcasted on almost all national televisions in our neighbouring countries. Of course, I would like to use this opportunity to thank the organizers as well, whose professional work secured that the semi-finals in Rijeka were well organized and very well attended.

Vojko Obersnel, Mayor of the City of Rijeka

City Games project is an excellent idea, very skilfully transformed into a TV game show. It targets very broad audience and presents an exceptional occasion for fun and sport cheering family get-together. It continues on the same page where once famous project "Games without frontiers" concluded, but it is modern, with many opportunities to make it even better with teams from all over Europe. I believe that City Games are exactly the TV format that is currently absent but very much needed on our programmes. It might be even attractive as an event broadcasted live during the summer months.

Meri Popova, Head of Culture, Art & Entertainment Program Macedonian Radio and Television

The Editorial board of Entertainment program was pleased to include City Games in its program scheme. In our opinion, the project was organized very correctly, well and interesting. There is certainly still room in the production, which is good, and I believe that this team will take advantage of that and we know what such a huge project means for the organization. Sincere thanks to the agency Adria events for the cooperation and I hope that we will have an even better cooperation in the future.

Congratulations to the entire team!

Mario Galunič, Entertainment program editor TV Slovenia

A very interesting format which found its audience literally in all generations in Montenegro. A great way to connect the entire region. The relationship of our company with City Games is best described by the fact that we selected prime time for broadcasting the show – at 20,00h on Saturdays, as well as broadcasting the show at our satellite program. TV Montenegro is also directly involved in the national competition of City Games project, which we broadcasted in our own production. On top came the victory of the Montenegro team, so we are impatiently looking forward to the next season.

Ivan Maksimović, Entertainment - commercial program editor RTV Montenegro

WHO IS COMPETING?

Teams representing their cities are competing and they are obtaining their right to compete upon invitation from the host city.

Teams consist of 8 to 10 competitors (depending on the competition status) of which at least 3 must be female. The applications are carried out by means of our official website www.city-games.com or by the competition coordinator. Apart from "ordinary" people, numerous famous persons and famous athletes competed in our games.

Few of the most famous are:

- Vladimir Gojković (one of the best water polo players of the world and the head coach of Montenegro national water polo team),
 - Dimitrij Gjorgjiev (world champion in kickboxing from Macedonia),
 - Alessio Sartori (Italy, double Olympic-medal winner),
 - Sandra Peršić (former Yugoslavian national basketball team member),
 - Martin Rončević (Croatian champion in CrossFit),
 - Nato Cvitan (Croatian champion in kickboxing),
 - Rok Klavor (Slovenian gymnast),
 - Mario Šivolija (Croatian boxer in light-heavyweight class),
- and many other successful athletes.

I participated in many sports competitions where games for me hold a special charm. I've really enjoyed competing and getting to know new people in these two years of my participation. From one hand games bring me back to my childhood and playfulness, and on the other they challenge my desire to win like other big competitions. City games have proved that they can be organized in a modern way looking worldly but still being ours.

Vladimir Gojković, head coach of Montenegro national water polo team and a competitor for Herceg Novi team (Montenegro)

It was a great pleasure for me to participate and compete in the international finals. The adrenalin that follows this games is the same as the one professional athletes feel on important competitions. The Games are the Olympics of the small coastal towns and cities that participate in this competition during summer months. It's a great experience, which I will always remember.

Alessio Sartori, multiple Italian Olympian in rowing and competitor for San Felice Circeo team (Italy)

I am very pleased to be invited to this year's Games that have a long tradition and a great organization. For me personally the games have been an excellent experience. My dear friends G-in Cifliganec's words, that sport is the best entertainment which brings us together, confirm. I thank you and look forward to seeing you again!

Dimitar Gjorgjiev, world champion in kickboxing and a competitor for Skopje team (Macedonia)

Milivoj Dukić, Montenegro Olympian in sailing and competitor for Herceg Novi team (Montenegro)

Botond Tölgyesi, multiple Hungarian judo champion and competitor for team Harkány (Hungary)

Simona Fabjan, Slovenian champion, one of the best European beach volleyball players for team Ljubljana (Slovenia)

Mario Todorović, Croatian record holder in swimming, multiple Olympics competitor and competitor for Korčula team (Croatia)

GAMES EVERYWHERE AROUND US

City Games provide perfect content for media. It is always positive, interesting with attractive and joyful images.

The message contained in this project corresponds with one that every reader, viewer and listener wants to hear during the time of leisure and summer months. That is entertainment, laughter and positive energy. City Games cooperates with large number of online and offline media franchises in the Alpe Adria & Balkan region.

We are most pleased that by introducing new member countries we managed to stir interest in their media franchises as well. It is exactly the international part of the competition which received most media attention in the region and many compared us with the once popular "Games without Borders".

In the sixth season the City Games TV shows was broadcasted by 6 television networks with national coverage. In the next season our wish is to include at least 10!

RIJEKA » Puno gledalište Bazena Kantrida ispratilo je i drugu međunarodnu polufinalnu večer Jadranskih igara, nakon koje su postale poznate i preostale tri ekipe koje će se ogledati u velikom finalu ove sportsko-zabavne manifestacije, osmišljene u stilu nekad vrlo popularnih Jadranskih susreta, što će 12. rujna biti održano u Biogradu na moru. Uz Maribor, Pag i Skoplje koji su u finale izborili još u petak, sinoć su nastup u Biogradu na moru osigurali i ekipe Moconesija (Italija), Herceg Novog (Crna Gora) i Harkanyja (Mađarska). U polufinalnim susretima natjecali su se još Neum (BiH), Niš (Srbija), Bad Ranksenburg (Austrija), Solin (Hrvatska), Igalo (Crna Gora) i Velenje (Slovenija).

A FEW WORDS ABOUT PAST 6 YEARS

There are thousands and thousands of kilometres lying behind us, 218 organized events and more than 100 different places we visited during this six seasons.

In 2010. we started from our home country Croatia. Since 2013. our borders broadened and City Games are now visiting Montenegro and Slovenia on a regular basis. At the 2015. International Finals we had teams from Croatia, Italy, Montenegro, Slovenia, Macedonia, Bosnia & Herzegovina, Hungary, Serbia and Austria.

Behind us are numerous hours spent with our teams and their fans. We formed many friendships that are binding and keeping us together not only during summer months but also during the winter when the project is being prepared for the next season.

During the six years of project existence not a single incident happened and this makes us especially proud.

We believe it is due to our organizing goals to emphasize fair play policy, respect and friendship.

City Games also bring value to the communities participating in events. For example our prize for winner cities were fire trucks and ambulance cars.

City Games are also gladly participating in humanitarian actions and one such action happened with the SOS Children's Village Croatia. The cooperation was initiated with the participation of children from SOS Children's Village Lekenik at junior games. The companionship resulted in submitting a cheque in the amount of 5.000 EUR at the International finals in Biograd na Moru.

1 team
6 years
218 events
1.200 organized meetings
25.000 distributed T-shirts
41.000 delivered e-mails
670.000 kilometer travelled

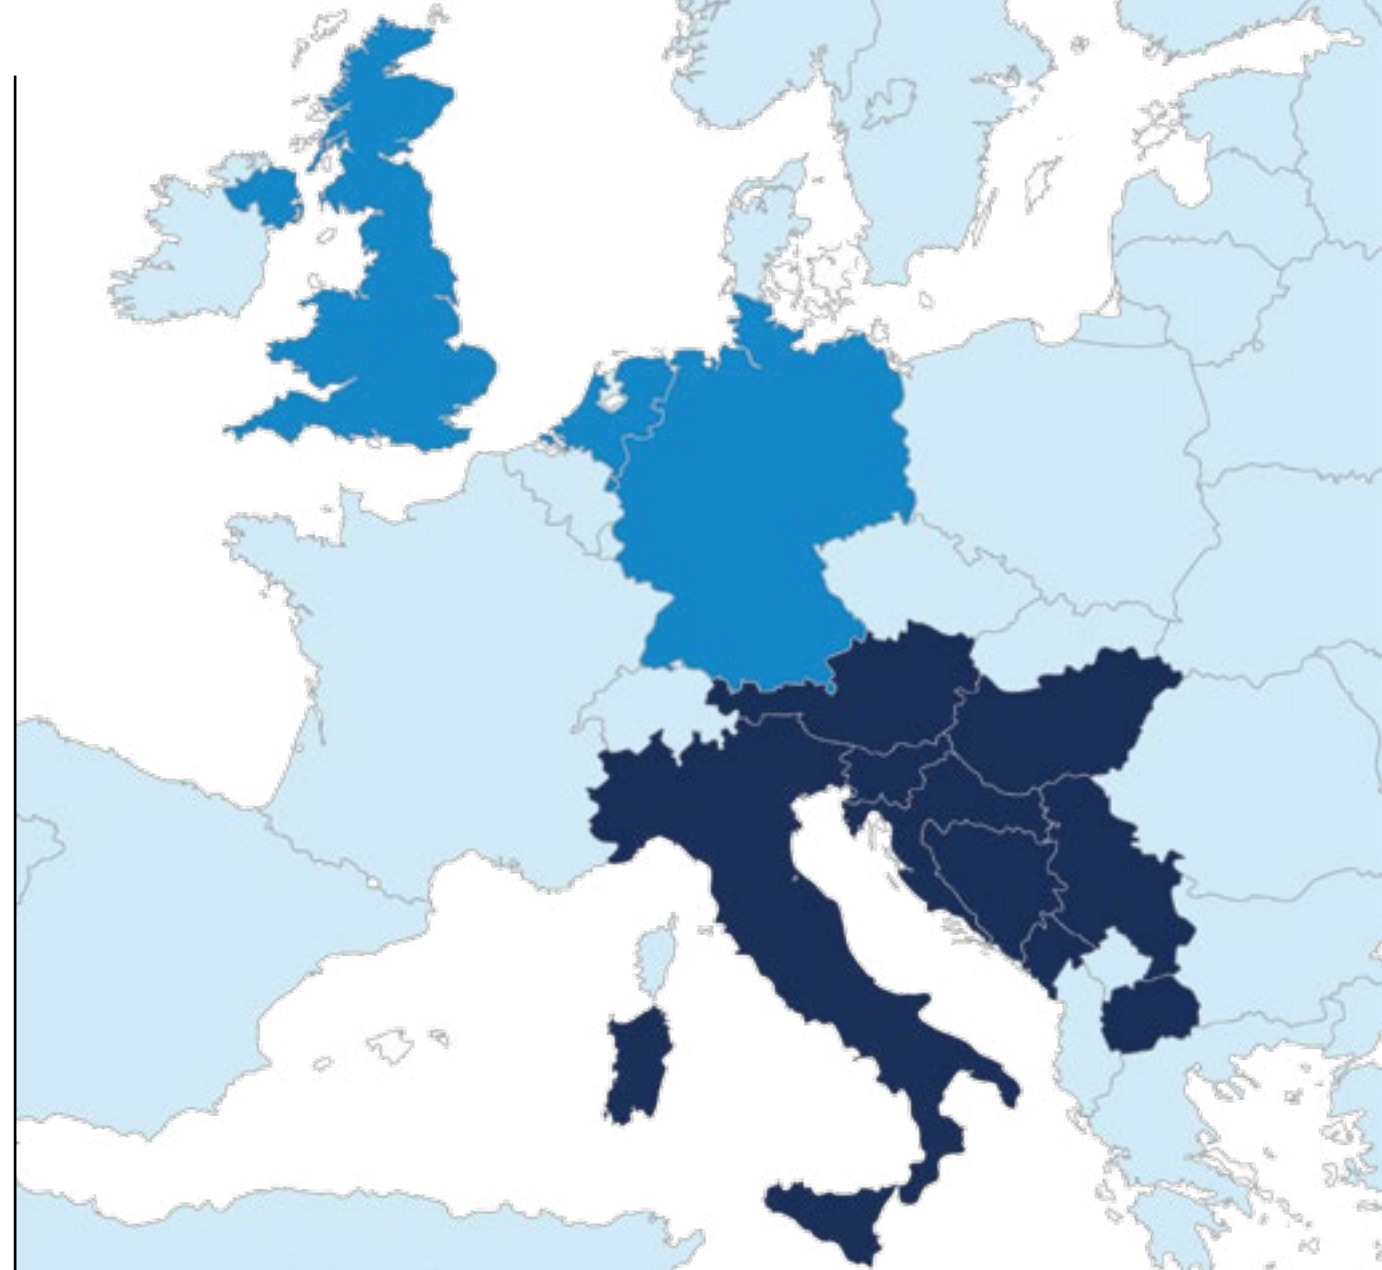

WHAT IS AWAITING US IN 2016.

After 2015. and the International finals with 9 countries, our mission is to spread positive energy and good emotions to 3 new countries and with 12 countries in total to head towards conquering the next season which is ahead of us.

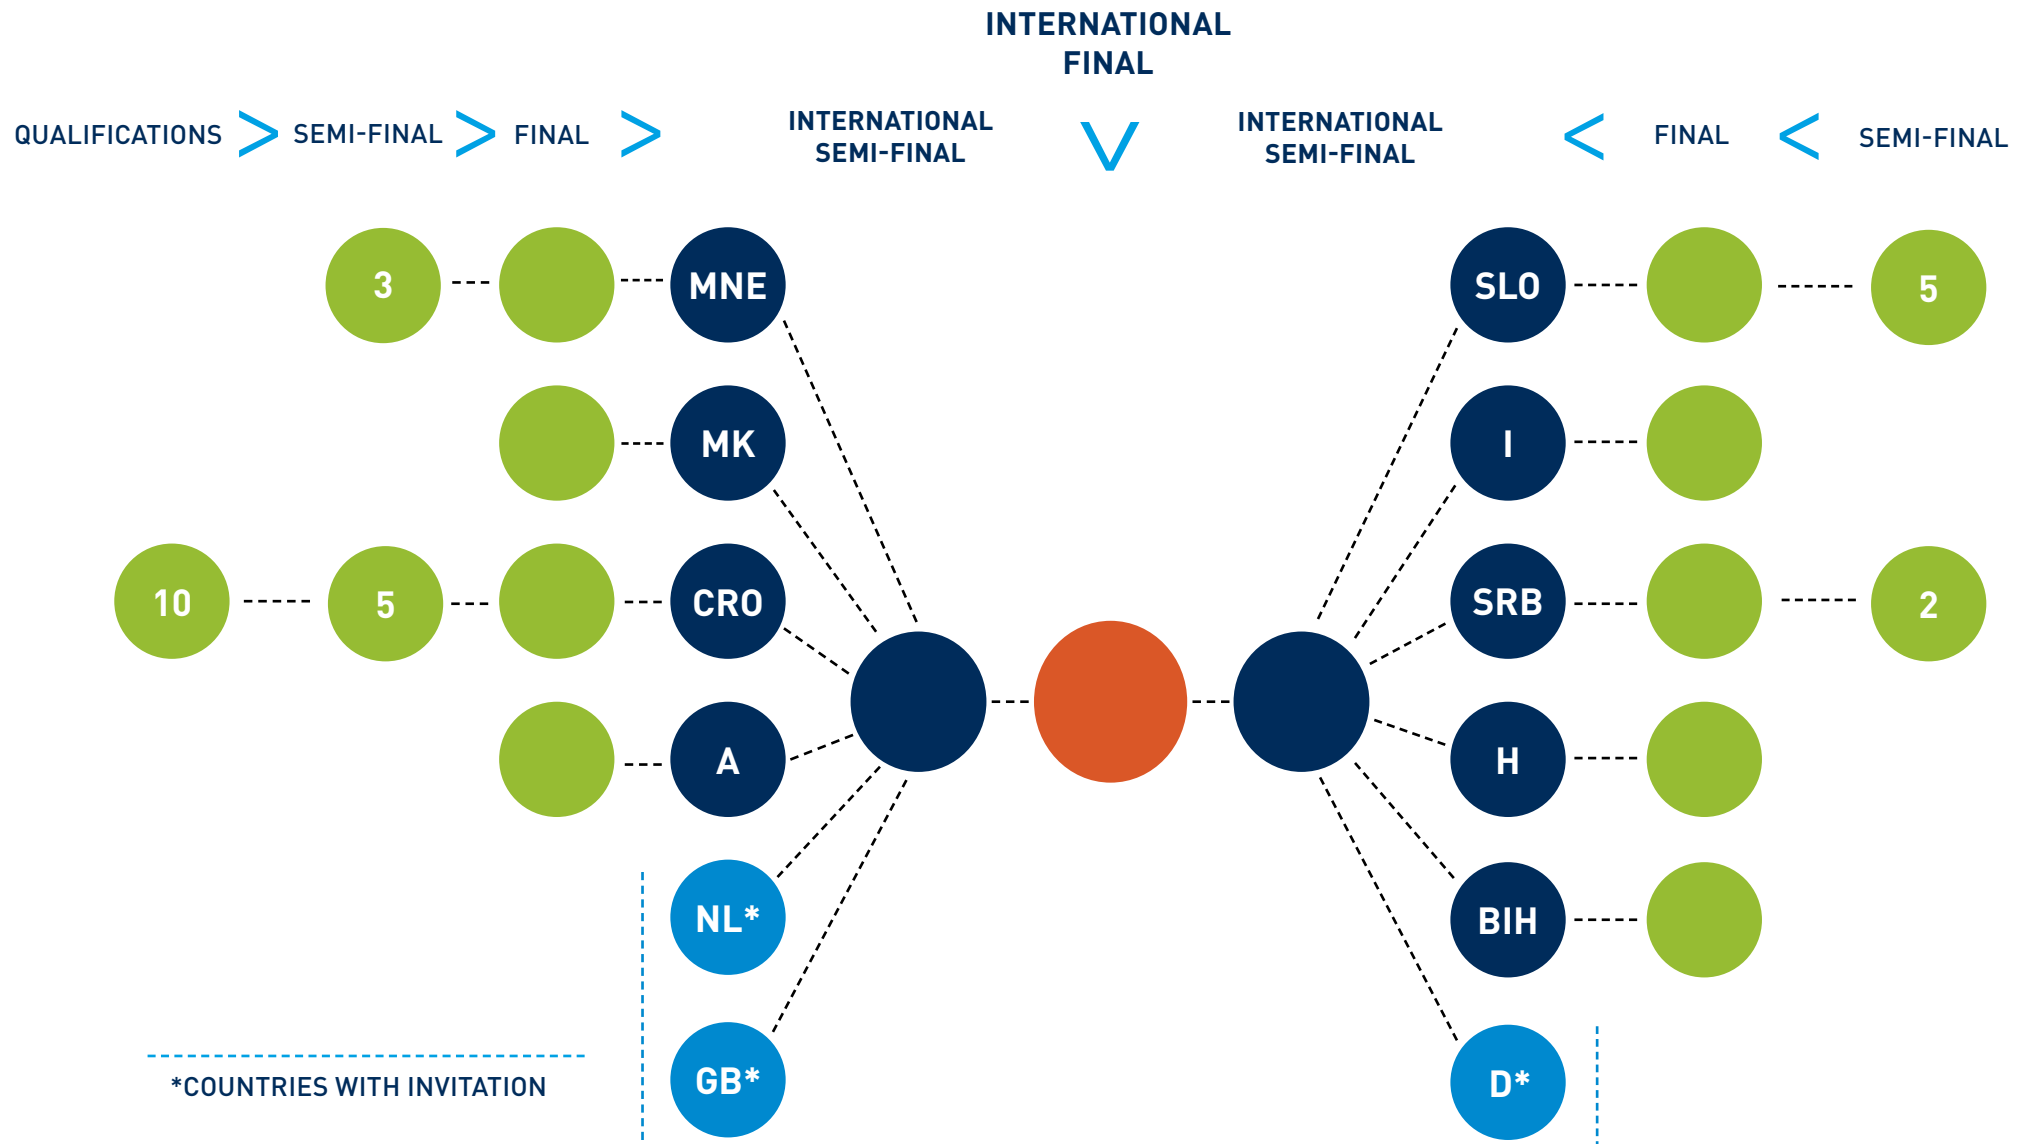

International final 2015.

3 new members for 2016. season

COMPETITION SCHEME

The year 2016. will bring us even more competitions in new member countries which will result in better competing teams for the international part of the competition.

WHO ARE WE?

Adria events® is an agency specialized in event management and production of creative marketing concepts of all formats. We started in 1998. and became one of the biggest regional event management agency.

We are not a traditional agency with traditional services. We are producing our own events and manufacture our brands. We value facts, our vision is always focused on future improvement and our goal is to broaden the cycle of our satisfied clients and partners. We dare to claim that we are different, creative, resourceful and very imaginative. We believe in honest relationships, we are working from the heart and we are fully focused on achieving our goal.

Our motto is to make every event a special story and a unique experience.

Croatia Harley Days 2014. - biggest motorcycle meeting in Europa (30 000 bikers)

Rijeka Marathon - biggest street race in Croatia

CREW

When a team is working together on one project for six years, it means that we have “the right team”.

As the project is growing, so is our team developing and growing up. Our team is a mix of experienced managers and young ambitious people willing to learn. We connected all this into a one whole, in one team ready for new challenges.

We are especially pleased that during the past years we expanded the team and developed considerable support in Slovenia, Montenegro, Italy, Serbia and Austria.
